Subject: Air Quality Permit 17924
CC: <lbienenfeld@gmail.com>

Dear Sirs,

I strongly oppose the plan to issue Air Quality Permit 17924 for building a coal-fired power plant in Georgia. This is a transparent attempt to make an end-run around new environmental regulations that are scheduled to go into effect soon, and it must not be allowed to happen. In combination with the recent legislation pushed through by the Bush administration allowing mountain-top removal mining to continue in the Appalachians, this will result in accelerating environmental destruction, as well as damage to air and water quality. Please do NOT approve this permit!

Sincerely,

John
